

MCS-011

1. Write an algorithm to calculate the factorial of a given number.
2. Write a C program to create a structure to store name, roll number, address and course (BCA/MCA) of 10 students, use array of structures to display details of the students.
3. Write a C program for multiplication of two 4 X 4 matrices.
4. What is the difference between high level language and low level language why C language is referred to as middle level language?
5. What is for loop? How is it different from do... While loop? Explain with the help of an example also explain use of "break statement" .
6. Explain the use of conditional operator with the help of an example.
7. Explain difference between call by value and call by reference with the help of examples.
8. Difference between sequential and random access files.
9. What is union? How is it different from structure? Explain declaration and use of union in C with the help of an example and program.
10. Define a macro to find the cube of a given number.
11. What is recursion? Write a recursive C program to find the factorial of a given number.
12. Write a C program to generate a Fibonacci series using recursion.
13. Write a C program using structure to calculate the gross salary and net salary if Basic, DA, TA and deduction are given as input.
14. Write a C program which take a string as input and print it in reverse order without using inbuilt function.
